

# NetPoint | CATALOG

# Parabolic Antenna

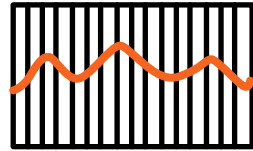

**NP1GEN2** Standard parabolic antenna for high gain point to point links up to 18.62mi including pigtails.

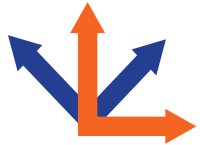

Size

Gain

4.9 a 6.4 GHz

Dual Polarization

Pigtail

Lightweight

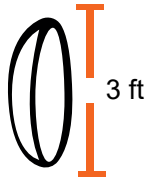

Compatible accessories:

Radome shield Modal **ARNP1** | **RAD60** (Radome)

# Parabolic Antenna

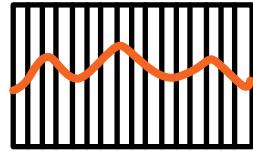

**NP2GEN2** Standard parabolic antenna for high gain point to point links up to 43.49mi including pigtails.

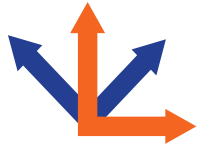

Size

Gain

4.9 a 6.4 GHz

Dual Polarization

Pigtail

Lightweight

Compatible accessories:

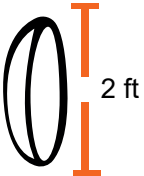

Radome shield Modal **ARNP2** | **RAD100** (Radome)

# Parabolic Antenna

**NPTR1**

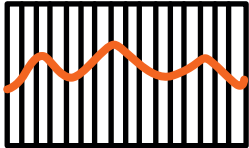

Parabolic antenna for point to point links in coastal areas or extreme climates, pigtails included and windbreak radome for protection. Up to 18.62mi.

Size

Gain

4.9 a 6.2 GHz

Radome

Dual Polarization

Pigtail

Weather protection

Galvanized hardware and fasteners

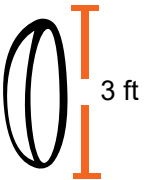

Compatible accessories:  
Radome shield Modal **ARNP1** | **RAD60** (Radome)

# Parabolic Antenna

**NPTR2**

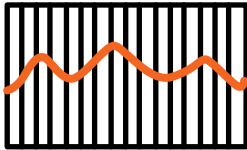

Parabolic antenna for point to point links in coastal areas or extreme climates, pigtails included and windbreak radome for protection. Up to 43.49mi.

Size

Gain

4.9 a 6.2 GHz

Radome

Dual Polarization

Pigtail

Weather protection

Galvanized hardware and fasteners

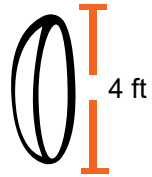

Compatible accessories:  
Radome shield Modal **ARNP2** | **RAD100** (Radome)

# Super Performance Parabolic Antenna

## NPTR3

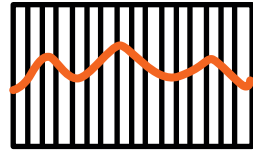

Super performance parabolic antenna for high gain links for long distances, ideal for carrier type installations. Up to 74.56mi.

Size

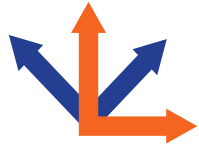

Gain

4.9 a 6.2 GHz

Radome

Dual Polarization

Pigtail

Weather protection

Galvanized hardware and fasteners

Compatible accessories:

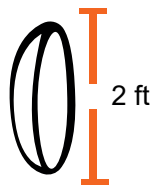

Radome shield Modal **ARNP3** | **RAD120** (Radome)

# Ultra- Shielded Performance Antenna

## NPX1

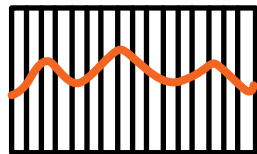

Ultra-shielded performance antenna for high interference point to point links, close the secondary lobes and stop listening to other antennas near your towers. Ideal for carrier type links. Up to 18.62mi.

Size

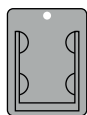

Gain

4.9 a 6.4 GHz

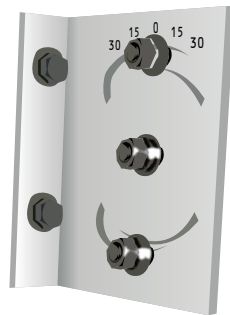

Dual Polarization

Bracket

Pigtails

Millimeter adjustment assembly

Shielded model for noise suppression

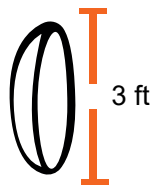

Compatible accessories:  
Radome Modal **RAD60**

# Ultra-Shielded Performance Antenna

## NPX2

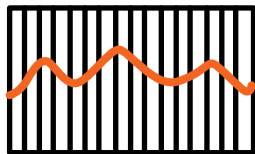

Ultra-shielded performance antenna for high interference point to point links, close the secondary lobes and stop listening to other antennas near your towers. Ideal for carrier type links. Up to 43.49mi.

Size

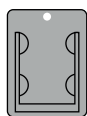

Gain

4.9 a 6.4 GHz

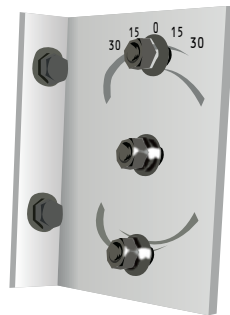

Dual Polarization

Bracket

Pigtails

Millimeter adjustment assembly

Shielded model for noise suppression

Compatible accessories:  
Radome Modal **RAD100**

# Ultra- shielded performance antenna

## NPX3

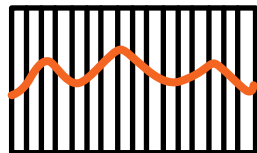

Ultra-shielded performance antenna for high interference point to point links, close the secondary lobes and stop listening to other antennas near your towers. Ideal for carrier type links. Up to 62.13mi.

Size

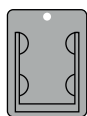

Gain

4.9 a 6.4 GHz

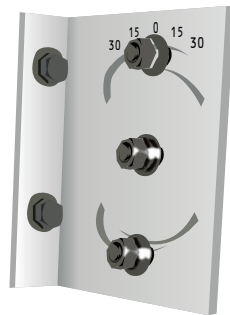

Dual Polarization

Bracket

Pigtails

Millimeter adjustment assembly

Shielded model for noise suppression

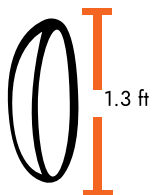

Compatible accessories:  
Radome Modal **RAD120**

# Twist-on Antenna

## NP PRO - S

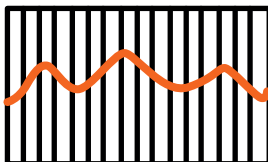

Ideal for Mimoso C5X and B5X radios with non-connectorized waveguide. Up to 9.3 mi.

Size

Gain

4.9 - 6.4 GHz

Ready to install

Zero return loss

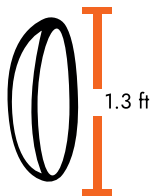

Compatible accessories:  
**Twinwaves adapter**

# Twist-on Antenna

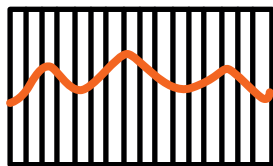

**NP PRO - C** Rotating antenna with waveguide adapter for connectorized radios for users of pigtails or installations other than Mimosa C5X or B5X models. Up to 9.3 mi.

Size

Gain

4.9 - 6.4 GHz

Pigtails

Ready to install

Zero return loss

Adaptor  
Twinwaves

Dual Polarization

Compatible accessories:  
**Twinwaves adaptor** Including pigtail

# Radome

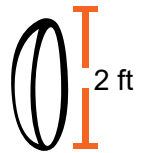

Windbreak radomes compatible with NetPoint antennas to protect the towers and cut the resistance generated by the wind, ideal for extreme or humid climates

Compatible with models:

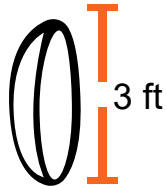

NPGEN2

NPX

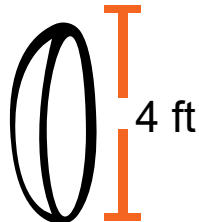

NPTR

RAD60

RAD100

RAD120

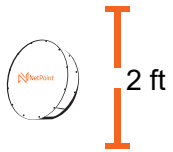

# Anti-Noise Shield

Anti-noise armor compatible with NetPoint antennas for shielding open antennas from interference against interference from other antennas, increases the link quality, reduces secondary lobes and concentrates antenna beamwidth.

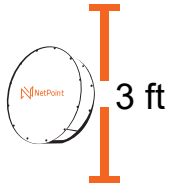

Compatible with models:

NPCGEN2

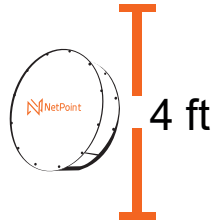

NPTR

ARNP1

ARNP2

ARNP3

# Anti-Noise Armor for Ubiquiti Antennas

Models:

## UN30 - UN34

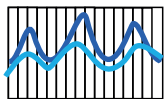

RDG30

RDG34

dBi  
gain

Raise quality  
of your links

Screws  
Included

Protection against  
the weather

Anti-noise armor compatible with Ubiquiti RDG30, RDG34, AF5G34-S antennas RDG30, RDG34, AF5G34-S from Ubiquiti.
